(54) Title: A OCB MODE LIQUID CRYSTAL DISPLAY AND A DRIVING METHOD OF THE SAME

(57) Abstract: A liquid crystal display includes a TFT array panel, a color filter panel, a liquid crystal layer in an OCB mode, a pair of compensation films provided on outer surfaces of the TFT array panel and the color filter panel, a pair of polarization films provided on outer surfaces of the compensation films, and so on. When the wavelength dispersion of the liquid crystal layer is larger than the wavelength dispersion of the first and the second compensation films, the cell gap on the red pixel area > the cell gap on the green pixel area > the cell gap on the blue pixel area. On the contrary, when the wavelength dispersion of the liquid crystal layer is smaller than the wavelength dispersion of the first and the second compensation films, the cell gap on the red pixel area < the cell gap on the green pixel area < the cell gap on the blue pixel area.
